Projects

Solo Indie Game Project | Unreal Engine 5 (C++ / Blueprints)

- Advanced Player Controller: Developed a first-person movement system including HeadBob, procedural animations, and surface-dependent sound triggers.
- Interaction Framework: Implemented an interface-based system for complex world interactions (multi-type door logic, notes, and physics objects).
- Gameplay Mechanics: Designed and coded a Flashlight system and a Night Vision Camera with battery resource management and UI integration.
- Asset Pipeline: Created 3D environmental assets in Blender and executed level assembly in UE5.

Education

Dec 2022 - May 2026 [STEP Computer Academy, Odesa](#)
Programming C++, C#, Python, Js

Sep 2019 - June 2024 [Completed English language courses following the R.Yu. Martynova methodology, Odesa](#)
GPA: 10 out of 12

Soft Skills

- Self-Management
- Fast Learner
- Problem Solving
- Analytical Thinking
- Attention to Detail
- Team Collaboration

Technical Skills

- Unreal Engine 5 (C++, Blueprints)
- Programming: C++, OOP, SOLID Principles, Git
- Art & Design: Blender (Modeling), Level Design, UI/UX (Figma/Miro)

Languages

English: Intermediate (B1-B2)
Russian: Native
Ukraine: Native
